by Preston Lee

Colors are ever-changing in the world of design and lifestyle. I tend to lean towards shades of gold, magenta, amethyst, and Moroccan blues to create a feeling of richness and warmth. I chose these lavish accessories, fixtures, rugs, and furnishings for the summer lifestyle issue because of their playful approach with design. Each embodies the many characteristics that shape our summers with playful uses of “water-lily” inspired tables and sculpture, as well as reflective “sea” shades of cut and blown glass. The hand-tufted woven rug brings in the garden with floras and berries. These lifestyle pieces are essential to achieve summer-time elegance in your home or villa.
